

Use Maths-Pro or Geo-Pro to draw large versions of one or more of the following. Use guidelines on Maths-Pro to check whether lines are parallel or not, and measure shapes carefully to check if they are the same size.

- 1 Which parallelogram diagonal is longer?
- 2 Does the short line meet the top of the longer line?
- 3 Is the top of the large trapezium longer than the top of the smaller one?
- 4 Can you count the black dots?
- 5 Move the page and observe the chequered circle.
- 6 Which circle part is bigger?
- 7 Are the inner shapes squares or not?
- 8 Duck or rabbit?
- 9 Is the bold curve a perfect circle?
